

MORA UPENDHRA CHARY

Python Developer | Django Developer | Full Stack Developer (Python & React.js)

Hyderabad, Telangana, India | Phone: +91-9550140615 | Email: upendhra517@gmail.com

GitHub: github.com/upendher5G1 | LinkedIn: [Add your LinkedIn profile URL] | Portfolio: [Add your portfolio URL]

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2026) with hands-on experience building full-stack web applications using Python, Django, Flask, and React.js. Skilled in developing REST APIs, integrating authentication systems, and working with SQL and NoSQL databases including MySQL, SQLite, and MongoDB. Comfortable with the complete software development lifecycle, from data modeling and backend logic to responsive frontend design and deployment. Strong problem-solving ability, quick to learn new technologies, and eager to contribute as an entry-level Software Developer, Python Developer, or Full Stack Developer.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java (Basics), SQL

Frontend: HTML5, CSS3, Bootstrap, React.js, Responsive Design

Backend: Django, Flask, Flask-WTF, Flask-Login, Jinja2, REST APIs, SQLAlchemy

Databases: MySQL, SQLite, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Linux, Postman-style API testing, Web Speech API

Deployment: Render, Vercel, Gunicorn, Procfile-based deployment (Railway/Heroku compatible)

Core Concepts: Object-Oriented Programming, Data Structures, Authentication & Authorization, CRUD Operations, MVC Architecture, Software Development Lifecycle

PROJECTS

AI-Based Road Safety Hazard Forecasting System — *Python, Flask*

- Designed a prediction model to forecast road accident risks and hazard zones from transportation datasets.
- Built a Flask-based web interface to deliver real-time hazard forecasts to end users.

GitHub: [View Repository](#) | **Live Demo:** [View Live Site](#)

Real-Time Fraud Detection System — *Python, SQL*

- Built a system to detect fraudulent financial transactions in real time using data processing pipelines.
- Queried and managed transaction datasets using SQL for pattern analysis and validation.

GitHub: [View Repository](#) | **Live Demo:** [View Live Site](#)

WhatsApp Clone with Voice-Enabled Contact Search — *JavaScript, MongoDB, Web Speech API*

- Developed a web app with voice-enabled contact search and real-time filtering (Web Speech API); MongoDB backend.

GitHub: [View Repository](#) | **Live Demo:** [View Live Site](#)

PrepDeck AI - Interview Preparation Platform — *Python, Flask, SQLAlchemy, Flask-Login, Bootstrap 5, SQLite*

- Developed a full-stack Flask web application for interview preparation, featuring mock interviews, a 300+ question bank across 14 categories, and a resume review tool.
- Implemented secure authentication with Flask-Login, hashed passwords, and CSRF-protected forms via Flask-WTF.
- Built a mock interview module with randomized questions, a live timer, self-scoring, gamification (streaks, badges, leaderboard), and an admin panel.

GitHub: [View Repository](#) | **Live Demo:** [View Live Site](#)

Personal Portfolio Website — *HTML, CSS, JavaScript, Responsive Design*

- Developed a personal portfolio website to showcase projects, technical skills, and professional background, with fully responsive design across desktop, tablet, and mobile devices.

GitHub: [View Repository](#)

To-Do List Web Application — *Python, Django*

- Built a Django-based to-do list web application allowing users to create, update, track, and delete tasks.

GitHub: [View Repository](#) | **Live Demo:** [View Live Site](#)

React Calculator App — *React.js*

- Built a responsive calculator web application using React.js, handling arithmetic operations and dynamic UI state.

Live Demo: [View Live Site](#)

EDUCATION

B.Tech, Computer Science Engineering — TKR Engineering College, 2022 – 2026

Intermediate (Class XII) — KLN Junior College, 2022 | 67%

SSC (Class X) — Dr. AKR's Inspire School, 2020 | 10 GPA (100%)

CERTIFICATIONS

- Python Developer Certification – freeCodeCamp | Python Django – Infosys Springboard | ReactJS Foundations – ScholarHat (Jun 2026)
- Web Development Fundamentals – IBM SkillsBuild | Introduction to JavaScript – Sololearn | Git & GitHub Version Control (Jun 2026)

ACHIEVEMENTS

- HackerRank Certified: Software Engineer Intern role assessment and JavaScript (Intermediate) skill test (Jul 2026)
- Completed Deloitte Technology Job Simulation (Forage) and CodSoft Python Programming Virtual Internship (Jun 2026); strong problem-solving ability, quick learner, and passionate about software development.
